Case No. CV-08-1465-WHA

**MICROSOFT'S NOTICE OF
MOTION AND MOTION TO
DISMISS OR, IN THE
ALTERNATIVE, SECOND
MOTION FOR A MORE
DEFINITE STATEMENT;**

**MEMORANDUM OF POINTS
AND AUTHORITIES**

Date: September 4, 2008
Time: 8:00 a.m.
Courtroom: 9, 19th floor
Judge: William H. Alsup

NOTICE OF MOTION AND MOTION

TO PLAINTIFF LAURIE MARIE LASKEY: NOTICE IS HEREBY GIVEN that on September 4, 2008 at 8:00 a.m. or as soon thereafter as the matter can be heard, in the Courtroom of the Honorable William H. Alsup of the United States District Court of the Northern District of California located at 450 Golden Gate Ave., 19th Floor, Courtroom 9, San Francisco, CA 94102, defendant Microsoft Corporation (“Microsoft”) will, and hereby does, move to dismiss the above-captioned action pursuant to Federal Rule of Civil Procedure 12(b)(6). Plaintiff has failed to comply with this Court’s order requiring a more definite statement and all of Plaintiff’s potential claims are barred by the applicable statutes of limitation.

If the Court construes the documents filed by Plaintiff entitled “More Defined Statement” and/or “More Defined Statement Rev#1” as an amended complaint, Defendant Microsoft requests in the alternative to move for a more definite statement pursuant to Federal Rule of Civil Procedure 12(e).

Microsoft bases its motion to dismiss on this notice of motion and motion, the memorandum of points and authorities in support thereof, the pleadings on file with the Court, and on such other evidence as may be presented before or at the hearing on this motion.

MEMORANDUM OF POINTS AND AUTHORITIES

I. INTRODUCTION

The Plaintiff has failed to file an amended complaint as required by this Court's earlier order granting Microsoft's Motion for a More Definite Statement. Instead, Plaintiff filed and served two convoluted documents that only further confuse this case. These documents do not attempt to set forth facts supporting any claims for relief and also do not contain a prayer for damages, as required by Federal Rule of Civil Procedure 8. Moreover, these documents are as vague, ambiguous, and defective as Plaintiff's original complaint. Plaintiff's failure to comply with this Court's order provides more than ample grounds warranting dismissal of this action.

In addition, this Court should also dismiss this action because all of the pleadings filed by Plaintiff to date make clear that any possible claims that Plaintiff may have against Microsoft are barred by applicable statutes of limitations.

II. BACKGROUND AND SUMMARY OF PLAINTIFF'S ALLEGATIONS

A. Plaintiff's Original Complaint

Plaintiff Laurie Marie Laskey filed suit against Microsoft in California state court on January 30, 2008. In the Complaint, Plaintiff asserted claims for general negligence, intentional torts, premises liability, and products liability using the Judicial Counsel of California's form complaint for Personal Injury, Property Damage, and Wrongful Death.¹ The Complaint further indicated that she sought to hold Microsoft liable for "other" causes of action such as "Computer crimes, Identity Theft, FCC Invasions, Code Violations, Technical Violations, Split Tunneling, Security Breach, Invasion of privacy, stalking, etc." Complaint at 3, ¶ 10. No cause of action forms or additional information was attached supporting these other claims.

The cause of action forms attached to the original Complaint list several dates upon which Plaintiff allegedly suffered injury. These dates are:

¹ A courtesy copy of the Complaint is attached hereto as Exhibit 1.

- November 19, 2002: Cause of Action for Intentional Tort and Cause of Action for General Negligence;
- May 8, 2003: Cause of Action for Intentional Tort; and
- October 17, 2002: Cause of Action for Premises Liability.

Defendant further stated in the Complaint that her “evidence dates back to 1996.” Complaint at Cause of Action – Products Liability.

B. Microsoft’s First Motion for a More Definite Statement

After Microsoft was served with the Complaint on February 15, 2008, Microsoft removed the case to this Court on March 17, 2008 on the grounds of diversity jurisdiction. Microsoft timely filed a motion for a more definite statement pursuant to Federal Rule of Civil Procedure 12(e). On June 10, 2008, the Court granted Microsoft’s motion for a more definite statement, holding:

Plaintiff’s complaint is entirely vague, ambiguous, and incomprehensible to the point that defendant would be unable to formulate any responsive pleading. Accordingly, plaintiff is ordered to file a more definite statement with respect to all claims asserted.

Order Granting Defendant’s Motion for a More Definite Statement and Vacating Hearing, Dkt. # 39.

C. Plaintiff’s “More Defined Statements” Recently Filed

On June 9, 2008 - the day before the filing of the Court’s order granting Microsoft’s motion for a more definite statement - Plaintiff filed a document with the Court entitled “More Defined Statement.” Dkt. #38.² This document does not purport to be an amended complaint. Instead, it is a list of numbered paragraphs attaching several exhibits, most of which appear to be printouts from websites or documents appearing on Plaintiff’s computer. The document contains a rambling narrative of the contents of these exhibits. The document does not contain any causes of action or a prayer for relief.

² A courtesy copy of Plaintiff’s “More Defined Statement” is attached hereto as Exhibit 2.

On June 26, 2008, Plaintiff served what appears to be a further revision of this document, entitled “More Defined Statement Rev#1.”³ This document attaches several additional exhibits with further narrative on these exhibits, but is similar to the first document filed.

Both documents chronicle the continued problems and concerns that Plaintiff has had with her computer(s), namely with hackers, viruses, and/or strange occurrences that Plaintiff cannot explain. Plaintiff requests that new laws be put into place to prevent other consumers from having similar problems. *See, e.g.*, More Defined Statement Rev#1 at 4 ¶ 3i. Plaintiff points to alleged wrongdoings by a number of companies who are not parties to this lawsuit. *See, e.g., id.* at 4 ¶ 3i (referring to Charles Industries); *id.* at 4 ¶ 3h (referring to Intel Corporation). Plaintiff further alleges one additional date of an email that is supposedly relevant to her injuries – December 4, 1997. *Id.* at 5 ¶ 4.

To date, Plaintiff has not served an amended complaint in this action, as required by the Court’s order of June 10, 2008. Pursuant to Federal Rule of Civil Procedure 12(e), Plaintiff was required to file an amended complaint within ten days of the court’s order. The ten day period has now expired.

III. ARGUMENT

A. The Court Should Grant Microsoft’s Motion to Dismiss the Action Because Plaintiff Has Failed to File an Amended Complaint As Ordered by the Court

Federal Rule of Civil Procedure 12(e) states:

A party may move for a more definite statement of a pleading to which a responsive pleading is allowed but which is so vague or ambiguous that the party cannot reasonably prepare a response. The motion must be made before filing a responsive pleading and must point out the defects complained of and the details desired. If the court orders a more definite statement and the order is not obeyed within 10 days after notice of the order or within the time the court sets, **the court may strike the pleading or issue any other appropriate order.**

(Emphasis added).

³ A courtesy copy of Plaintiff’s “More Defined Statement Rev#1” is attached hereto as Exhibit 3.

1 Among the “any other appropriate order[s]” that the court may issue when a party fails to
 2 comply with an order requiring a more definite statement is an order dismissing the action,
 3 which may be granted within the court’s discretion. 2-12 Moore’s Federal Practice - Civil §
 4 12.36.

5 The Court should grant this motion to dismiss the instant action because Plaintiff has
 6 failed to comply with the Court’s order to file an amended complaint. This Court should
 7 not consider Plaintiff’s “More Defined Statement” or “More Defined Statement Rev#1” an
 8 amended complaint. Federal Rule of Civil Procedure 8(a) requires that a complaint contain
 9 the following:

10 (1) a short and plain statement of the grounds for the court’s jurisdiction,
 11 unless the court already has jurisdiction and the claim needs no new
 12 jurisdictional support;

13 (2) a short and plain statement of the claim showing that the pleader is entitled
 14 to relief; and

15 (3) a demand for the relief sought, which may include relief in the alternative
 16 or different types of relief.

17 The documents Plaintiff has filed contain none of the above requirements. Furthermore,
 18 these documents necessarily rely on or refer to the allegations appearing in Plaintiff’s
 19 original Complaint. Accordingly, these documents do not comply with Local Rule 10-1,
 20 which states: “Any party filing or moving to file an amended pleading must reproduce the
 21 entire proposed pleading and may not incorporate any part of a prior pleading by
 22 reference.”

23 As there is no operative complaint, this litigation should be dismissed.

24 **B. The Court Should Further Grant the Motion to Dismiss Because**
 25 **Plaintiff’s Claims are Barred by the Statute of Limitations**

26 Dismissal is additionally warranted because the information appearing in Plaintiff’s
 27 pleadings indicate that Plaintiff’s claims, even if they were articulated in the proper
 28 procedural form, are barred by the applicable statute of limitations. Where facts and dates
 alleged in the complaint indicate that a claim is barred by the statute of limitations, a motion

1 to dismiss for failure to state a claim is proper. *See Jablon v. Dean Whitter & Co.*, 614 F.2d
2 677, 682 (9th Cir. 1980).

3 Federal courts in diversity cases apply the applicable state law statute of limitations.
4 *See Guaranty Trust Co. of New York v. York*, 326 U.S. 99 (1945). As this case was
5 originally filed in California and Plaintiff's alleged injuries occurred in California,
6 California's statutes of limitations are controlling. Causes of action for general negligence,
7 intentional torts, and products liability are subject to a two year statute of limitations under
8 California law. *See* Cal. Code Civ. Proc. § 335.1 ("Within two years: An action for assault,
9 battery, or injury to, or for the death of, an individual caused by the wrongful act or neglect
10 of another."). Causes of action for damage to real property are governed by a three year
11 statute of limitations. *See* Cal. Code Civ. Proc. § 338(b) ("Within three years: An action for
12 trespass upon or injury to real property.").

13 The various dates alleged in Plaintiff's complaint – all in 2002 or 2003 – make clear
14 that her injuries occurred many years prior to the critical dates for purposes of the
15 applicable statutes of limitations.⁴ Plaintiff's action was not filed until January 30, 2008 –
16 as many as five or six (or more) years after the alleged dates of her injuries. All of
17 Plaintiff's claims sound in tort or injury to property, and are therefore all barred by the two
18 or three year statutes of limitations.

19 For this reason, Plaintiff cannot possibly amend her complaint to correct these
20 defects, and the motion to dismiss should therefore be granted without leave to amend and
21 with prejudice.

22 **C. In the Alternative, the Court Should Grant Microsoft's Further Motion**
23 **for a More Definite Statement**

24 If the Court nevertheless finds that Plaintiff's "More Defined Statement" or "More
25 Defined Statement Rev#1" should be treated or construed as an amended complaint,

26 _____
27 ⁴ To the extent the Court considers Plaintiff's More Defined Statement Rev.#1 to be
28 an amended complaint, it is also appropriate to note upon a motion to dismiss that this
document contains an additional date of injury that is even earlier – December of 1997.

1 Defendant requests in the alternative that the Court grant a further motion for a more
2 definite statement pursuant to Federal Rule of Civil Procedure 12(e).

3 A Rule 12(e) motion for a more definite statement is proper “[if] a pleading to which
4 a responsive pleading is allowed but which is so vague or ambiguous that the party cannot
5 reasonably prepare a responsive pleading.” Fed. R. Civ. P 12(e). Courts may grant such
6 motions when pleading is “so vague or ambiguous that the opposing party cannot respond,
7 even with a simple denial, in good faith or without prejudice to himself.” *Cellars v. Pacific*
8 *Coast Packaging, Inc.*, 189 F.R.D. 575, 578 (N.D. Cal. 1999); *see also McHenry v. Renne*,
9 84 F.3d 1172, 1179 (9th Cir. 1996) (Even though a complaint is not required to designate
10 which statute or other provision of law has been violated, a court may in its discretion, in
11 response to motion for more definite statement under Rule 12(e), require such detail as may
12 be appropriate in the particular case).

13 Plaintiff’s “More Defined Statement” and “More Defined Statement Rev#1” are so
14 confusing and unintelligible that they prevent Microsoft from drafting its answer. These
15 documents are replete with the same deficiencies as Plaintiff’s original Complaint. For
16 example, they contain extraneous facts about wrongdoings and actions committed by third
17 parties. Nowhere in the document does Plaintiff allege how Microsoft caused her injuries
18 or what Microsoft allegedly did wrong.

19 Plaintiff’s “More Defined Statement” is filled with questions, rather than statements
20 of facts, as was her initial Complaint. These questions indicate that Plaintiff herself is
21 unsure of what she alleges in this action and whom she is alleging caused her harm. For
22 example, plaintiff asks questions such as the following:

- 23 • “Is it a new virus? . . . Exhibit A is a copy of my email attempt to contact
24 icw5. icw5 is a what being used by whom? *See* More Defined Statement
25 Rev#1 at 1 ¶ 1.
- 26 • “Since the operator couldn’t do an emergency break through was my property
27 always online even though I wasn’t? Were the hackers able to know when I
28 went online via a remote connection? If so how was that established?” *Id.* at
4 ¶ 3h.

- 1 • “I hope I did that correctly. Is this an indication of a hardware problem
2 (product Liability)?” *Id.* at 1 ¶ 2.
- 3 • “I’m not sure how to turn my originals in? Federal or State? Or save them
4 just in case I end up in the 9th district court or save them if I have to go
5 public? I’m not willing to have my evidence all over the place anymore.
6 Should all my cases be consolidated to Federal court?” *Id.* at 2 ¶ 2.
- 7 • “Would this be an indication of Breach of Contract? Does Microsoft have
8 Internet Referral Service Servers or is that what a Router is called? User
9 shows up which includes a name and password, is this part of a computer
10 program (virus) that allows others to hack?” *Id.* at 3 ¶ 2 (emphasis omitted).

11 Plaintiff’s submissions are filled with confusing and nonsensical questions such as the
12 foregoing that fail to set forth a simple rendition of the basic facts of this case.

13 Plaintiff also refers repeatedly to other companies who are defendants in other
14 actions in which she is also the plaintiff, further muddling her allegations. For example,
15 plaintiff makes statements such as the following:

- 16 • “In my email dated 12-4-1997 (Laskey v RCV [sic] and Laskey v
17 AOL) The email reflects the following ‘We would like to hire you to
18 do a plan check’ instead of a plan check I ended up doing an ‘Internet
19 Check’. I didn’t know that my job mirrored my task. I gave my
20 word.” *Id.* at 5 ¶ 4.
- 21 • “Charles Industries posts the information online in regards to the product
22 therefore it is not proprietary therefore the operation and maintenance
23 manuals should have been made available.” *Id.* at 4 ¶ 3i.
- 24 • “Were the hackers able to know when I went online via a remote connection?
25 If so, how was that established? Intel Corporation?” *Id.* at 4 ¶ 3h.

26 Microsoft is left to guess at what allegations such as these have to do with Microsoft. To
27 the extent this Court finds that this action should not be dismissed, Microsoft should be
28 entitled to a clear and concise statement in the form of a proper amended complaint about
its actions that allegedly caused Plaintiff’s harm. Plaintiff’s general allegations about
wrongs committed by unspecified entities are insufficient.

1 **IV. CONCLUSION**

2 For the reasons set forth above, the Court should grant Microsoft's motion to dismiss
3 this action. In the alternative, Microsoft requests that the Court grant its second motion for
4 a more definite statement, and enter an order providing for dismissal of this action with
5 prejudice pursuant to Rule 41(b) should Plaintiff fail to file and serve an amended
6 complaint within ten days. Fed. R. Civ. P. 12(e).

21 More Defined Statement

22 1. **Exhibit A:** It's not a person it's a virus. Someone and or others appear to be using a
23 partition on my computer(s) which involves icw5. Is it a new virus? I found the same thing
24 in regards to Laskey v Adobe. How many partitions would a computer be able to support?
Exhibit A is a copy of my email attempt to contact icw5. icw5 is a what being used by
whom?

25 2. **Exhibit B:** Is the print out from my computer. How is icw5 installed on the computer(s)?
26 If I remember correctly I came across the file when I clicked on the header arrow in the
27 "find files and folders" options. I thought it was odd that the location where you typed
28 in the files and folders you are looking for is to the left on the side yet a header row
is available at the top of the screen? When you go online you use the header row to type
in your search requests. Since two options appear and only one is typically used why would
that be? When I clicked on the arrow the file and or files presented themselves. I was
told to keep a journal so each time I looked at something on my computer I wrote it down.

I hope I did that correctly. Is this an indication of a hardware problem (product liability)? ICWX25A is the name of the file that was printed from my lap top. Gateway on remote shows up = yes. Is that an indication of a remote connection? 3=waitfor "NAL=",10 shows up. NAL backwards is LAN and or Local Area Network. Since the connector in the second phone box should be attached to the incoming wires from the street yet is not, would that be an indication that my property was wired backwards? Is this an indication of reverse commands and or reverse IP? Entry_Name=Microsoft Internet Referral Service therefore it involves Microsoft. Does Microsoft have Internet Referral Service **Servers** or is that what a **Router** is called? User shows up which includes a name and a password, is this part of a computer program (virus) that allows others to hack?

3. Exhibit C:

3a. This is everything I was able to research online about icw5. I cannot afford to print out all 1 - 10 of about 465.

3b. icw5 appears to link via Sprint to other online web sites for **shopping**.

3c. Sprint shows up on my computer print outs.

3d. In the ARIN "Who is" data base when I looked up **gn** Sprint and **SBC** appear! Is gn being used as a link?

3e. If AT&T purchased SBC then why haven't the SBC IP blocks been transferred over to AT&T? Shouldn't they reflect AT&T and not SBC? That's another part of my problem, unfair business practice. That or we need to read the contract purchase agreement.

3f. If you are shopping online via hacking and purchase something, where would you ship it? I asked RCN if that's what the abandon house in Springfield IL is being used for.

3g. Some of the other things that show up are odd in themselves. One of the things I was wondering about is how the hackers link. The virus icw5 appears to be a Microsoft email address except the gn isn't normal. Is it a bogus web site? The same thing happens with headgames.com (see Laskey v Procter and Gamble). The icw5 web address simply links you to other sites but doesn't have a site of its own?

3h. The shopping web sites listed in relation to icw5 have the words **clone** and **worm** and **crack** and **hack**. Therefore I was wondering if the world wide web is part of the hackers programming. I have been asked about "my calendar" as in where were you? One of the documents I printed out says **clone** and or more than one of me and or Identity Theft. Since the operator couldn't do an emergency break through was my property always online even though I wasn't? Were the hackers able to know when I went online via a remote connection? If so how was that established? My friend's husband told me I have a serious hacker problem. What better way to know all about me and impersonate me then to be directly connected to me via my phone wires? I had no way of knowing that. My documents reflect that even after I was told that everything was now "ok" at my property that something must be connected wrong at SBC! The consumer has no control over that. Neighborhood watch - who would suspect a phone company vehicle?

3i. New laws need to be put in place to protect the consumer some of which would include GPS tracking devices on service vehicles. Having your phone box and or boxes installed inside of your garage that way no one else has access to your phone wires and or phone lines. You would then have to be home when the service occurs and or when changes are made to your service. The consumer would need to be made aware that they should supervise what's going on and or be able to hire an independent contractor to do the work instead of the phone company because like me how would the consumer know what the service technician was doing? In addition Landlords should be required to keep the phone closets locked. In 99% of the buildings I've ever been in they are but for some reason in the building I worked in it was not? In addition to having a network administrator for their building to supervise any changes being made. Not to mention in general operation and maintenance manuals **should always be provided to the consumer** at the time of **installation**. In my case I was never charged for the product it was just installed. The product installed exceeded the service requested so at the time of purchase does not apply. Charles Industries posts the information online in regards to the product therefore it is not proprietary therefore the operation and maintenance manuals should have been made available at the time of installation. I didn't know that the Charles Industries product had a DSL unit. Let alone

1 that it required power in order to operate. Is the power company (in my case PG&E)
2 notified when this product is installed? Who double checks things like this? How are the
3 audits performed for the power and phone companies? Has anyone ever gone out to a
4 consumer's property and double checked an installation based on inventory? They should.
5 The consumer is not made aware of all of this. It was not a pleasant thing to have to be
6 exposed to. It was the most traumatizing thing you can ever imagine having to experience;
7 you call the phone company because the operator can't do an emergency break through. The
8 phone company sends out someone to fix the problem. During the service call you suddenly
9 realize that you are potentially standing next to the person who hacked into your computer
10 and stole your identity and you don't know what to do about it or how to prove it. Should
11 I have had the police department present at that time? **YES!** Can you please send a police
12 officer out to my home while I have my phone line checked? That would not have been a
13 normal request in hind sight that would have been a better way to go about it. How was I
14 to know?

15
16 4. **Exhibit D:** In addition to people, businesses are also being affected by this. I have
17 enclosed an article for your review. It's been a few years since this article was
18 published I'm sure the numbers are much higher now. Possibly the FTC could provide us with
19 information in regards to all of this. Like me, it would be on file. I have tried to
20 provide the FTC with all of my information. I haven't been able to keep up with that and
21 do all of this.

22 Split tunneling occurred. Microsoft's servers are being used. If the servers are not being
23 maintained properly that would establish negligence, premises liability, obstruction of
24 justice, breach of contract and in general mass tort.

25 In my email dated 12-4-1997 (Laskey v RCN and Laskey v AOL) The email reflects the
26 following "We would like to hire you to do a plan check" instead of a plan check I ended
27 up doing an "Internet Check". I didn't know that my job mirrored my task. I gave my word.

28 Is this the evidence you seek?

Google Search

- Lookup monstermarketplace.com in simple text format at <https://www.showmyip.com/simple> or in XML format at <https://www.showmyip.com/xml>
- Lookup 216.105.60.75 in simple text format at <https://www.showmyip.com/simple> or in XML format at <https://www.showmyip.com/xml>

IP Address Lookup Form	
IP Address: <input type="text"/>	
or Host Name: <input type="text"/>	
or "Long" IP Address: <input type="text"/>	
or Tor node nickname: <input type="text"/>	
or Tor node fingerprint: <input type="text"/>	
Lookup Subscription Key: <input type="text"/>	
<input type="button" value="Secure Lookup (using SSL) ..."/>	4,998 more Lookups allowed today.
Check your Subscription status here .	
Choose the lookup fields you want to see. Using our simple text or xml interface, you can specify with the &get= parameter any available field name, in any sequence. For example http://www.showmyip.com/simple/?host=yahoo.com&get=ip,country,state_name,city,timezone will get you a comma-delimited list of only the 5 lookup fields specified.	
Multiple data sources are used for some lookup fields. You will see (verified) whenever and wherever we can get the same result from more than 1 data source. In some instances, though, this will only be available to subscribers.	

IP Address Lookup file to upload:	
<input type="text"/>	<input type="button" value="Browse..."/>
Lookup Subscription Key: <input type="text"/>	
Lookup data fields to retrieve: <input type="text" value="ip,country_code,remaining_count"/>	
<ul style="list-style-type: none">• For a complete list of available Lookup data fields, do your file upload from here.	
<input type="button" value="Secure Lookup File Upload (using SSL) ..."/>	

Need to purchase additional IP Address Lookups? Or get access to all returned data fields? Or need more consistent, faster lookup results?

Санкт-Петербург: бесплатные тестовые входы в инет

08.06.2006 ::: Re@ctor :::  ::: комментов: 14 ::: просмотров: 770

Вспомнил тут про списки старые бесплатных тестовых входов и интернет, выложу, может кому-то пригодится.. Актуально только для Питера.

icw5 =))))

Легендарное ICW5, в котором сидели люди на спринте и общались. Щас оно всёдохлое конечно, нет связи по ip между помпами в подсети, но пусть болтается на вечную память. Про icw5 вы можете почитать набрав в яндексе icw5 спринт.

Славыч

ExclusivE [08.06.2006 22:41:09]:

Кстати а pkey/peterlink на котором мы так весело юзали инет пару дней и
летали каждые 15 минут уже прикрыли?

Re@ctor [08.06.2006 23:25:36]:

да ты чо, давно прикрыли, через два дня после наличия там инета =)))
но было весело :))

мне сразу тестовик ланка вспоминается, где криворукие админы настроили
блин ограничение в инет, заключающееся в наличии у всех на тестовом доступе
инета =]

а ещё тестирование нового пула птна, где по статистике подключений

популярность росла м геометрической прогрессии в кубе *) - в первый день - 2человека, в следующий - 50, через пару дней - около нескольких тысяч подключений, а дальше шкалило..
ну да ладно, хым..

весёлые всё же времена были..

Владимир [09.06.2006 12:08:22]:

Да, весело было.Отсидел с 4 до 1 ночи невылезая.Только через минут 40 выкидывало. Жаль что узнал в последний день про тестовик ПТНа.

Re@ctor [09.06.2006 13:56:12]:

мэйби проверить акки застарелые с инфостара.. авось локаль какую эквантовскую разбанили..

Владимир [11.06.2006 14:43:26]:

акки застарелые проверить было бы неплохо. А проверить весь ио - еще лучше. День дозваниваться сидеть, а потом модем ставит кеды...

Re@ctor [11.06.2006 22:13:06]:

уу.. обзвонить весь ио это аццко. тебе на это не хватит пары месяцев. особенно с импульсным набором. скорее приедут атсники на дом с лопатами.

Владимир [12.06.2006 15:33:06]:

Вроде в х.25 faq писалось о проверки акков через циску, токо какого прова я не помню. Почеиу бы не написать прогу, кот. будет проверять все это дело по телнету

Гость, обозвал себя TruNoob [23.06.2006 15:36:40]:

Тестовый вход недавно открывшегося провайдера (Санкт-Петербург).

Телефон: 5831818

Логин: test

Пароль: welcome

Связь хорошая, не лагает. Список доступных ресурсов:

<http://www.key.ru>

<http://www.infostar.ru>

<http://www.mail.ru> (с которого я сейчас и пишу!)

<http://www.gamezone.ru>

<http://www.cprise.ru>

<http://www.yandex.ru> (!!)

Возможно, какие-то еще, о которых не говорится на официальном сайте.

Лимит на сессию - 30 минут. Вполне достаточно чтобы проверить почту.

Это не кредит, если у кого-то возникнут такие подозрения. Предоставлять лимитированный доступ за деньги никто не будет.

ExclusivE [24.06.2006 01:06:57]:

Все равно все тестовики скоро накроются тазомм.. См. [тут](#).

Re@ctor [24.06.2006 16:05:01]:

ЖЭС N 9 ГУЖА НЕВСКОГО РАЙОНА

Адрес: 193318, Санкт-Петербург, Коллонтай ул., 32, корп. 3
Телефон: (812) **5831818**
Факс: (812) 5831818

очень смешно. так когда-то у нас на фостаре прикалывались - выкладывали телефоны знакомых которым хотели отомстить за что-то как очередную халыву, и бедному человеку звонили с модемов постоянно

Re@ctor [24.06.2006 16:07:07]:

<http://www.mail.ru> (с которого я сейчас и пишу!)

угу, молодец. с mail.ru ты пишешь в комментарии на трунете. Эта пять! Афтар пеши исчо!

Avex [25.06.2006 02:23:57]:

Ага он бы ещё сюда <http://truenet.net.ru> приписал

Online auction scams soar — complaints nearly double

By Carolyn Said
CHRONICLE STAFF WRITER

As online auctions explode in popularity, more crooks are muscling in on the territory.

Complaints about Internet auctions were the fastest-growing category in an annual Federal Trade Commission report on fraud released Tuesday. They al-

most doubled to 98,650 in 2004, up from 51,000 in 2002, and accounted for 16 percent of all complaints.

The total number of complaints about Internet-related crimes — including fraudulent auctions, Internet services and scams in which the consumer was contacted or responded via the Internet — was 205,568. The crimes

cost consumers \$265 million, with a median loss of \$214, the FTC said.

Despite the rapid rise in Internet fraud, identity theft — through credit card, bank and phone fraud — continued to be the largest source of complaints. The FTC said 246,570 people reported that they were victimized, up from

Vigilantes take on scammers in effort to slow Internet fraud

► FRAUD

From Page A1

161,890 in 2002.

Overall, consumers reported losing more than half a billion dollars to fraud last year, the FTC said. The agency received 635,173 complaints, up 57 percent from 403,688 in 2002.

"There's a certain percentage of our population that are con artists and scammers, let's say it's about 3 percent," said Rosalinda Baldwin, CEO of TheAuctionGuild.com, an upstate New York site that acts as a watchdog and information provider for online auction users. "As those people get more Net savvy, their business in the analog world is just going to move online."

"It behooves a person who is thinking about transacting business online to become educated," said David Steiner, president of AuctionBytes.com in Massachusetts. "It's not an innocent little

ound anymore." The online auction fans have gone even further. Frustrated that auction leader eBay, as they see it, isn't sufficiently proactive about hunting down con artists, they've taken matters into their own hands.

False bids, fake receipts

Self-styled auction vigilantes try to combat online scammers by giving them a taste of their own medicine. Some submit false bids to auctioneers they believe are crooks, including sending fake Western Union receipts to trick the auction-holders into thinking they've landed a sale.

"We bait (scammers). We waste their time," said Keith, the moderator of a site called TheScamBaiter.com. He declined to give his last name for fear of reprisals from scammers.

"This weekend, a friend and I 'bought' 30 or 40 Super Bowl tickets from Romanian scammers," he said. "If we get four or five people baiting a single scammer, he's hands full. He thinks he's going to get all this money."

Keith said he spends a couple of hours a day "baiting" auction scammers, fitting it in around his job as a Virginia building contrac-

"We've done a lot more damage to the scammers than eBay has ever done. We have it down to a science, where we're really confident whoever we're going after (is a fraudulent seller)," he said.

Keith said scam baiters also will launch "denial of service" attacks,

"It behooves a person ... to become educated. It's not an innocent little playground anymore."

DAVID STEINER
president of AuctionBytes.com

in which hundreds of computers flood fraudulent sites with messages, effectively shutting them down.

The baiters have an unusual way to measure success.

"We also try to get death threats from (scammers)," Keith said. "Among scam baiters, a death threat is considered a trophy. That means you're doing your job, you really pissed them off."

eBay spokesman Hani Durzy said the company does not condone such practices.

"We believe there is a very clear line between community activism and vigilantism," he said. "Anybody who takes what we consider to be un-eBay like actions against other users because of an assertion they have, we request our community refrain from doing that."

Only a small fraction of 1 percent of eBay listings is confirmed to be fraudulent, Durzy said. Last year the company hosted 1.4 billion listings, including both auction and fixed-price items.

"In the grand scheme of things, it's a very rare occurrence on eBay," he said. "Fraud is not completely eliminated on eBay nor on any other open, transparent market."

Some eBay watchers say the company does all it can to downplay fraud complaints because it doesn't want to scare customers away.

"eBay is horrible," said Baldwin of TheAuctionGuild.com. "If you report too many scam sellers on the site, if eBay does anything about them, it's a miracle. And if you get too vocal about it, especially if you talk to a reporter, eBay suspends you. That's crazy. They don't want people hearing about fraud."

eBay said it takes complaints seriously.

"We look at every fraud report

that comes into us," Durzy said. "We rely on the community to alert us to instances where they feel they have been wronged."

Marcy Fraser, who works in administration at UCSF, said she was disappointed with eBay's response when she bought a \$150 mini-disk recorder that arrived dented and unusable.

"The auction company response was pathetic," she said. "I tried to do the eBay and PayPal (eBay's online payment service) mediation. They were both completely useless. They make you fill out a bunch of forms, make you wait, do what they call an investigation, which is basically sending e-mails to the sender, so it's your word against theirs."

After returning the damaged item and unsuccessfully requesting her money back, Fraser said she contacted police in the seller's hometown of Wilton, Conn. "Ultimately the problem was solved by a resourceful police detective, and my money was finally returned," she said.

'Trust and safety team'

Durzy said eBay has more than 1,000 people on its "trust and safety team," which includes engineers, code writers, analysts and fraud investigators. The company does not break out the number of fraud investigators.

The FTC said the Bay Area had the dubious distinction of registering high on the agency's list of regions with the most per-capita fraud complaints. The area of San Jose, Sunnyvale and Santa Clara had 2,988 complaints, or 172.1 per 100,000 residents, making it second in the nation after the Washington, D.C., region.

San Francisco, Oakland and Fremont ranked seventh in the nation with 6,748 complaints, or 163.6 per 100,000 residents.

**MICROSOFT'S NOTICE OF
MOTION AND MOTION FOR A
MORE DEFINITE
STATEMENT; MEMORANDUM
OF POINTS AND
AUTHORITIES**

Date: June 12, 2008
Time: 2:30 p.m.
Courtroom: 6, 17th floor
Judge: Vaughn R. Walker

NOTICE OF MOTION AND MOTION¹

TO PLAINTIFF LAURIE MARIE LASKEY: NOTICE IS HEREBY GIVEN that on June 12, 2008 at 2:30 p.m. or as soon thereafter as the matter can be heard, in the Courtroom of the Honorable Vaughn R. Walker of the United States District Court of the Northern District of California located at 450 Golden Gate Ave., 17th Floor, Courtroom 6, San Francisco, CA 94102, defendant Microsoft Corporation (“Microsoft”) will, and hereby does, move for a more definite statement pursuant to Federal Rule of Civil Procedure 12(e). Plaintiff’s Complaint is so unintelligible that Microsoft cannot reasonably be required to frame a responsive pleading.

Microsoft bases its motion for a more definite statement on this notice of motion and motion, the memorandum of points and authorities in support thereof, the pleadings on file with the Court, and on such other evidence as may be presented before or at the hearing on this motion.

¹ Microsoft originally filed this motion on March 24, 2008, and noticed it for hearing before Judge Spero. On April 4, 2008, the action was reassigned to Judge Walker and all hearing dates were vacated. Microsoft hereby re-notices this previously-filed motion for hearing before Judge Walker.

MEMORANDUM OF POINTS AND AUTHORITIES

I. INTRODUCTION

Plaintiff's Complaint against Defendant Microsoft Corporation ("Microsoft") is filled with questions and sweeping statements utterly lacking even a basic level of factual detail, rendering the Complaint unintelligible. Plaintiff purportedly attempts to allege claims for negligence, intentional torts, premises liability, and products liability, but the scant facts alleged in support of these causes of action are nonsensical, confusing, and unclear. In fact, rather than affirmatively alleging facts in support of these causes of action, Plaintiff's Complaint is littered with questions, indicating that Plaintiff has no idea what she is alleging that Microsoft did wrong. The Complaint appears to state nothing more than the fact that "strange things appear on [Plaintiff's] computer." Microsoft is left without fair notice of the claims that Plaintiff makes and is unable to tell what Plaintiff believes Microsoft (as opposed to the other "Doe" defendants) did to cause her harm. Because Microsoft cannot formulate a coherent response to this Complaint without further clarification, the Court should grant Microsoft's motion for a more definite statement.

II. BACKGROUND AND SUMMARY OF PLAINTIFF'S ALLEGATIONS

Plaintiff Laurie Marie Laskey filed the Complaint in California state court on January 30, 2008. After Microsoft was served with the Complaint on February 15, 2008, Microsoft removed the case to this Court on March 17, 2008. Microsoft has not yet answered.

In the Complaint, Plaintiff asserts claims for negligence, various intentional torts, premises liability, and products liability using the Judicial Counsel of California's form complaint for Personal Injury, Property Damage, and Wrongful Death.² The Complaint further indicates that she seeks to hold Microsoft liable for "other" causes of action such as "Computer crimes, Identity Theft, FCC Invasions, Code Violations, Technical Violations, Split Tunneling, Security Breach, Invasion of privacy, stalking, etc." Complaint at 3, ¶ 10.

² A courtesy copy of the Complaint is attached hereto as Exhibit 1.

1 According to the Complaint, Plaintiff was “attached to a Virtual Private Network
2 without my knowledge and hacked into.” *Id.* at 3, ¶ 15. She alleges that a “faulty system has
3 created a security breach.” *Id.* For the causes of action labeled by Plaintiff as “other” (i.e.,
4 Computer crimes, Identity Theft, FCC Invasions, Code Violations, Technical Violations,
5 Split Tunneling, Security Breach, Invasion of privacy, stalking, etc.), no further factual
6 allegations are stated.

7 For the negligence, intentional tort, premises liability, and products liability claims,
8 Plaintiff’s Complaint attaches Judicial Council Causes of Action forms for each claim. In
9 support of her cause of action for general negligence, plaintiff states only that “[y]ou have a
10 faulty system which created a security breach that allowed other [sic] to hack into my
11 computer and caused me to lose my means of employment.” *Id.* at Cause of Action –
12 General Negligence No. 2. She then presents the following questions: “A virtual server is
13 being used? Is that a game server? or does it relate to a virtual private network?” *Id.*

14 Plaintiff pleads a second cause of action for general negligence, again stating simply
15 that “[y]ou have a faulty system which created a security breach.” *Id.* at Cause of Action –
16 General Negligence No. 1. Again, she offers merely questions in place of factual details,
17 including the following:

18 was the Windows 95 print program ever upgraded? the hackers work in the
19 background and the printer icon shows up in Windows 98 and the other
20 current versions if it was never upgraded Microsofts employees would have
21 knowledge of that. My printer does strange things and strange things appear
22 on my computer(s).

23 *Id.*

24 Plaintiff further attempts to plead two causes of action for “Intentional Torts,” again
25 stating only that “Microsoft maintained a faulty system.” *Id.* at Cause of Action –
26 Intentional Tort Nos. 1 and 2. She claims that Microsoft’s servers “are not being maintained
27 properly” and that Microsoft has therefore “created a premises liability issue” and “is
28 supporting a crime ring.” *Id.* at No. 1. In support of her second intentional tort claim, she

1 refers to warnings received in “DNS reports,” asking “[d]o they switch it back and forth
2 whenever they want to hack?” *Id.* at No. 2.

3 For the cause of action for premises liability, plaintiff states that she was “connected
4 to a faulty system and it created a fault” while she was at home on her computer. *Id.* at
5 Cause of Action – Premises Liability. She specifies three counts of premises liability –
6 negligence, willful failure to warn, and dangerous condition of public property. *Id.*

7 Finally, Plaintiff also brings a claim for products liability, stating that Microsoft’s
8 “equipment, wiring, servers, routers, filters, computers, software, etc.” caused her injury,
9 seeking to hold Microsoft strictly liable. *Id.* at Cause of Action – Products Liability.

10 Plaintiff seeks compensatory and punitive damages. *Id.* at 3 ¶ 14. She claims to have
11 suffered damages for wage loss, loss of use of property, hospital and medical expenses,
12 general damage, property damage, loss of earning capacity, along with other damages such
13 as a lower credit score, expense of discovery, case related expenses, emotional distress,
14 attorneys fees, and discrimination. *Id.* at 3 ¶ 11.

15 **III. ARGUMENT**

16 **A. Legal Standard**

17 A Rule 12(e) motion for a more definite statement is proper “if a pleading to which a
18 responsive pleading is permitted is so vague or ambiguous that a party cannot reasonably be
19 required to frame a responsive pleading.” Fed. R. Civ. P 12(e). Courts may grant such
20 motions when pleading is “so vague or ambiguous that the opposing party cannot respond,
21 even with a simple denial, in good faith or without prejudice to himself.” *Cellars v. Pacific*
22 *Coast Packaging, Inc.*, 189 F.R.D. 575, 578 (N.D. Cal. 1999).

23 The decision to grant a motion for a more definite statement is within the discretion
24 of the trial court, based upon the particular facts alleged in each case. *Kuenzell v. United*
25 *States*, 20 F.R.D. 96, 98 (N.D. Cal. 1957) (“Whether or not the motion should be granted or
26 denied depends primarily on the facts of each individual case, and it is ultimately within the
27 Court’s discretion to determine whether the information sought by the movant is necessary
28 to enable him to prepare a responsive pleading”); *see also McHenry v. Renne*, 84 F.3d 1172,

1 1179 (9th Cir. 1996) (Even though a complaint is not required to designate which statute or
2 other provision of law has been violated, a court may in its discretion, in response to motion
3 for more definite statement under Rule 12(e), require such detail as may be appropriate in
4 the particular case).

5 **B. Plaintiff's Complaint Is Unintelligible and Prevents Microsoft from**
6 **Formulating a Responsive Pleading.**

7 Plaintiff's Complaint is so confusing and unintelligible that it prevents Microsoft
8 from drafting its answer.

9 **1. To the extent that the Complaint alleges some wrongdoing by**
10 **anyone, Microsoft is unable to ascertain whether Plaintiff is even**
11 **alleging that Microsoft committed a wrong.**

12 From the Complaint, Microsoft is only able to ascertain that Plaintiff believes that
13 somehow and somewhere Microsoft maintained a "faulty system." Complaint at 3 ¶ 15.
14 Plaintiff makes exceedingly broad and sweeping generalizations in support of this claim,
15 such as "Microsoft is supporting a crime ring," *Id.* at Cause of Action – Intentional Tort No.
16 1, and "I was continually exposed to a harmful [sic] environment and lost my means of
17 employment because of it." *Id.* at Cause of Action – Intentional Tort No. 2.

18 It is impossible for Microsoft to answer these highly general allegations without at
19 least some additional detail. For example, nowhere in the Complaint does Plaintiff identify
20 specific products or services she was allegedly using. Moreover, Plaintiff completely fails
21 to allege how those products or services are connected to Microsoft. She refers to
22 "equipment, wiring, servers, routers, computers, software, etc.," but these types of products
23 could literally implicate thousands of different products distributed by Microsoft or by other
24 software or hardware manufacturers. Microsoft is left to guess whether Plaintiff was, for
25 example, a user of the Microsoft Windows operating system, a user of Microsoft software
26 such as Internet Explorer or Word, or a person accessing websites maintained by Microsoft.
27 In fact, Microsoft is unable to tell for certain whether the Plaintiff even had any connection
28 to Microsoft or its products whatsoever.

1 Much of the confusion created by the Complaint is due to the fact that the Plaintiff
2 never specifies the parties who caused her alleged harms. In addition to Microsoft, Plaintiff
3 has filed this action against 1000 “Doe” defendants, many of whom could be hackers she
4 believes stole her personal information. However, many of the allegations Plaintiff makes
5 appear to be directed at those defendants – but not Microsoft. The Complaint, however,
6 makes no attempt to distinguish between Microsoft and the other defendants, instead
7 referring generally to “they” and “them”. For example, in one place in the Complaint,
8 Plaintiff asks the question: “A virtual server is being used?” *Id.* at Cause of Action-General
9 Negligence No. 2. It is unclear whether Plaintiff is suggesting that hackers used a virtual
10 server to access her data or whether she instead means that Microsoft somehow used or
11 distributed a virtual server. Without some greater specification of the multitude of “theys”
12 and “thems” in the Complaint, Microsoft cannot determine whether Plaintiff’s various
13 allegations are directed to Microsoft or to someone else.

14 Many of the “facts” alleged in support of the specific causes of action only further
15 confuse the matter. In her claim for premises liability, for example, Plaintiff has checked a
16 box indicating that she is alleging a count for “Dangerous Condition of Public Property.”
17 *Id.* at Cause of Action – Premises Liability. She indicates that the condition for which she is
18 bringing suit was “created by employees of the defendant public entity.” Microsoft is not
19 able to respond to this claim because it has no way of knowing whether Plaintiff is alleging
20 that an unnamed Doe defendant that is also a public entity caused Plaintiff’s harm or
21 whether Plaintiff mistakenly believes that Microsoft is a public entity.

22 This situation is precisely the kind of situation in which courts routinely grant
23 motions for a more definite statement. In *Parker v. Brush Wellman, Inc.*, 377 F. Supp. 2d
24 1290 (N.D. Ga. 2005), the plaintiff’s complaint referred only generally to a group of
25 defendants, but failed to identify the role that each individual defendant’s products played in
26 causing Plaintiff’s harm. The court granted a defendant’s motion for a more definite
27 statement, finding that the absence of critical allegations as to *each* individual defendant
28 rendered the Complaint defective, as defendants “are left without ‘fair notice’ of the factual

basis underlying the claims that they must now attempt to defend.” *Id.* at 1295. The court held that “the Federal Rules do not permit a party to aggregate allegations against several defendants in a single, unspecific statement, but instead require the pleader to identify (albeit generally) the conduct of each defendant giving rise to his claims.” *Id.* at 1294; *see also Van Dyke Ford, Inc. v. Ford Motor Co.*, 399 F. Supp. 277, 284 (E.D. Wi. 1975) (granting a motion for a more definite statement where complaint referred generally to “plaintiffs” and “defendants” but failed make specific references to wrongful actions by each individual plaintiff and defendant).

Microsoft is therefore entitled to a clear and concise statement in the Complaint about its own actions that allegedly caused Plaintiff’s harm. Plaintiff’s general allegations about wrongs committed by unspecified entities are insufficient.

2. Plaintiff’s Complaint is filled with questions, rather than affirmative allegations of fact, demonstrating that Plaintiff does not know what she alleges.

The Complaint is further unintelligible because rather than stating facts supporting the claims for relief, Plaintiff’s Complaint is instead filled with a multitude of questions. These questions indicate that Plaintiff herself is unsure of what she alleges in the Complaint and whom she is alleging caused her harm.

For example, in her description of one of the claims for general negligence, Plaintiff offers the following questions: “A virtual server is being used? Is that a game server? or does it relate to a virtual private network?.” Complaint at Cause of Action – General Negligence No. 2. In support of an intentional tort claim, plaintiff similarly poses another question: “do they switch it back and forth when they want to hack?” *Id.* at Cause of Action – Intentional Tort No. 2. Furthermore, attached to the Complaint are exhibits covered in handwritten questions such as the following:

Is this why the phone wiring on the side of my home was installed different than it should have been?

Is there a file open at the DA’s? FBI? CIA?

1 Does this have something todo [sic] with the time and time zones?

2 What did I cut off of the side of my house at the phone box?

3
4 *Id.* at ex. page 36. The questions demonstrate that even the Plaintiff is unsure of what she is
5 alleging *anyone* – much less Microsoft – did wrong. Without further clarification,
6 Microsoft cannot formulate a coherent response to these claims, as it cannot even ascertain
7 what Plaintiff alleges Microsoft did wrong.

8 **3. Plaintiff has not stated facts demonstrating any causal connection**
9 **between Microsoft's actions and the damages Plaintiff allegedly**
10 **suffered.**

11 The damages allegations in the Complaint are likewise flawed and unintelligible.
12 Plaintiff states, for example, that she is entitled to compensatory damages for hospital and
13 medical expenses. *Id.* at 3 ¶ 11. The Complaint, however, fails to allege even a single fact
14 suggesting that Plaintiff may have suffered any injury requiring medical attention. The facts
15 that Plaintiff has pled suggest only that hackers *remotely* accessed her computer. Microsoft
16 is again simply left to guess how Plaintiff could have possibly sustained bodily harm on
17 these facts.

18 Plaintiff's allegations that she suffered other damages such as wage loss or
19 discrimination, *id.*, are similarly perplexing. The Complaint contains no facts explaining
20 any causal link between the actions (or inactions) of Microsoft and Plaintiff's alleged loss of
21 employment or discrimination she suffered. Microsoft cannot possible admit or deny these
22 allegations without more information from the Plaintiff about the supposed factual
23 connection.

24 **IV. CONCLUSION**

25 For the reasons set forth above, the Court should grant Microsoft's motion for a more
26 definite statement. Fed. R. Civ. P. 12(e).

of that. my printer does strange things and
strange things appear on my computer(s)

Page 1 of 1

156 Part II: Making Windows 95 Do Something

Leaving Scraps on the Desktop Deliberately

The Clipboard is a handy way to copy information from one place to another, but it has a major limitation: Every time you copy something new to the Clipboard, it replaces what was copied there before. What if you want to copy a bunch of things from a document?

If you were cutting and pasting over a real desktop, you could leave little scraps lying everywhere, ready for later use. The same *scraps* concept works with Windows 95: You can move information from window to window, using the desktop as a temporary storage area for your scraps of information.

For example, suppose that you have some paragraphs in a WordPad document you want to copy to some other places. Highlight the first paragraph, drag it out of the WordPad window, and drop it onto the desktop. Poof! A small Scrap icon appears on your desktop. See another interesting paragraph? Drag it onto the desktop, as well: Another Scrap icon appears.

Eventually, you'll have copies of your report's best paragraphs sitting in little scraps on your desktop. To move any of the scraps into another document, just drag them into that other document's window and let go.

Any remaining, unused scraps can be dumped into the Recycling Bin, or simply left on the desktop, adding a nice, comfortable layer of clutter.

To make a scrap, highlight the information you want to move, usually by running the mouse pointer over it while holding down the mouse button. Then, point at the highlighted information and, while holding down the mouse button, point at the Desktop. Let go of the mouse button, and a scrap containing that information appears on the Desktop.

Note: Not all Windows 95 applications support Scraps. In fact, WordPad is the only program in the Windows 95 box that can use Scraps.

Controlling the Printer

*

Many of the Windows 95 features work in the background. You know that they're there *only* when something is wrong and weird messages start flying around. The Windows 95 print program is one of those programs.

When you choose the Print command in a program, you may see the little Windows 95 printer icon appear at the bottom corner of your screen. When your printer stops spitting out pages, the little printer icon disappears.

Controlling Someones computer via the printer?
The hackers work in the background.
The printer icon shows up in window.
The printer icon is the windows 95 feature ever

DNSreport for msft.net

Generated by www.DNSreport.com at 17:29:11 GMT on 20 Jan 2008.

[Email link to](#)

Category	Status	Test Name	Information
	PASS	Missing Direct Parent check	OK. Your direct parent zone exists, which is good. Some domains (usually third or fourth level domains, such as example.co.us) do not have a direct parent zone ('co.us' in this example), which is legal but can cause confusion.
	INFO	NS records at parent servers	<p>Your NS records at the parent servers are:</p> <pre> ns1.msft.net. [207.68.160.190] [TTL=172800] [US] ns2.msft.net. [65.54.240.126] [TTL=172800] [US] ns3.msft.net. [213.199.161.77] [TTL=172800] [GB] ns4.msft.net. [207.46.66.126] [TTL=172800] [US] ns5.msft.net. [65.55.238.126] [TTL=172800] [US] </pre> <p>[These were obtained from a.gtld-servers.net]</p>

Parent	PASS	Parent nameservers have your nameservers listed	OK. When someone uses DNS to look up your domain, the first step (if doesn't already know about your domain) is to go to the parent server. If you aren't listed there, you can't be found. But you are listed there.
	PASS	Glue at parent nameservers	OK. The parent servers have glue for your nameservers. That means they send out the IP address of your nameservers, as well as their hostnames.
	PASS	DNS servers have A records	OK. All your DNS servers either have A records at the zone parent servers, or do not need them (if the DNS servers are on other TLDs). A records are required for your hostnames to ensure that other DNS servers can reach your DNS servers. Note that there will be problems if your DNS servers do not have these same A records.
	INFO	NS records at your nameservers	<p>Your NS records at your nameservers are:</p> <pre> ns4.msft.net. [207.46.66.126] [TTL=172800] ns5.msft.net. [65.55.238.126] [TTL=172800] ns1.msft.net. [207.68.160.190] [TTL=172800] ns2.msft.net. [65.54.240.126] [TTL=172800] ns3.msft.net. [213.199.161.77] [TTL=172800] </pre>
	PASS	Open DNS servers	OK. Your DNS servers do not announce that they are open DNS servers. Although there is a slight chance that they really are open DNS servers this is very unlikely. Open DNS servers increase the chances that of cache poisoning, can degrade performance of your DNS, and can cause your DNS servers to be used in an attack (so it is good that your DNS servers do not appear to be open DNS servers).
	PASS	Mismatched glue	OK. The DNS report did not detect any discrepancies between the glue provided by the parent servers and that provided by your authoritative

DNS servers.	
PASS	No NS A records at nameservers OK. Your nameservers do include corresponding A records when asked your NS records. This ensures that your DNS servers know the A record corresponding to all your NS records.
PASS	All nameservers report identical NS records OK. The NS records at all your nameservers are identical.
PASS	All nameservers respond OK. All of your nameservers listed at the parent nameservers respond
PASS	Nameserver name validity OK. All of the NS records that your nameservers report seem valid (no or partial domain names).
PASS	Number of nameservers OK. You have 5 nameservers. You must have at least 2 nameservers (RFC2182 section 5 recommends at least 3 nameservers), and preferal no more than 7.
PASS	Lame nameservers OK. All the nameservers listed at the parent servers answer authoritatively for your domain.
PASS	Missing (stealth) nameservers OK. All 5 of your nameservers (as reported by your nameservers) are a listed at the parent servers.
PASS	Missing nameservers 2 OK. All of the nameservers listed at the parent nameservers are also listed as NS records at your nameservers.
PASS	No CNAMEs for domain OK. There are no CNAMEs for msft.net. RFC1912 2.4 and RFC2181 10. state that there should be no CNAMEs if an NS (or any other) record is

		present.
PASS	No NSs with CNAMEs	OK. There are no CNAMEs for your NS records. <u>RFC1912</u> 2.4 and <u>RFC2181</u> 10.3 state that there should be no CNAMEs if an NS (or any other) record is present.
PASS	Nameservers on separate class C's	OK. You have nameservers on different Class C (technically, /24) IP ranges. You must have nameservers at geographically and topologically dispersed locations. <u>RFC2182</u> 3.1 goes into more detail about seconda nameserver location.
PASS	All NS IPs public	OK. All of your NS records appear to use public IPs. If there were any private IPs, they would not be reachable, causing DNS delays.
WARN	TCP Allowed	WARNING: One or more of your DNS servers does not accept TCP connections. Although rarely used, TCP connections are occasionally used instead of UDP connections. When firewalls block the TCP DNS connections, it can cause hard-to-diagnose problems. The problem servers are: 207.68.160.190: Error [No response to TCP packets]. 65.54.240.126: Error [No response to TCP packets]. 213.199.161.77: Error [No response to TCP packets]. 207.46.66.126: Error [No response to TCP packets]. 65.55.238.126: Error [No response to TCP packets].
INFO	Nameservers versions	[For security reasons, this test is limited to members]
PASS	Stealth NS record leakage	Your DNS servers do not leak any stealth NS records (if any) in non-NS requests.
		Your SOA record [TTL=86400] is: Primary nameserver: ns1.msft.net.

Hostmaster E-mail address: msnhst.microsoft.com.

Serial #: 2007121102

Refresh: 1800

Retry: 900

Expire: 2419200

Default TTL: 3600

INFO	SOA record	OK. All your nameservers agree that your SOA serial number is 2007121102. That means that all your nameservers are using the same data (unless you have different sets of data with the same serial number which would be very bad)! Note that the DNS report only checks the NS records listed at the parent servers (not any stealth servers).
PASS	NS agreement on SOA Serial #	OK. Your SOA (Start of Authority) record states that your master (primary) name server is: ns1.msft.net.. That server is listed at the parent servers, which is correct.
PASS	SOA MNAME Check	OK. Your SOA (Start of Authority) record states that your DNS contact email address is: msnhst@microsoft.com. (techie note: we have changed the initial '.' to an '@' for display purposes).
PASS	SOA RNAME Check	OK. Your SOA serial number is: 2007121102. This appears to be in the recommended format of YYYYMMDDnn, where 'nn' is the revision. So this indicates that your DNS was last updated on 11 Dec 2007 (and was revision #2). This number must be incremented every time you make a DNS change.
PASS	SOA Serial Number	OK. Your SOA REFRESH interval is: 1800 seconds. This seems normal (about 3600-7200 seconds is good if not using DNS NOTIFY; RFC1912 recommends a value between 1200 to 43200 seconds (20 minutes to 12 hours)). This value determines how often secondary/slave nameserver check with the master for updates.
PASS	SOA REFRESH value	OK. Your SOA RETRY interval is: 900 seconds. This seems normal (abo

SOA

	PASS	SOA RETRY value	120-7200 seconds is good). The retry value is the amount of time your secondary/slave nameservers will wait to contact the master nameserver again if the last attempt failed.
	PASS	SOA EXPIRE value	OK. Your SOA EXPIRE time: 2419200 seconds. This seems normal (about 1209600 to 2419200 seconds (2-4 weeks) is good). RFC1912 suggests 2 weeks. This is how long a secondary/slave nameserver will wait before considering its DNS data stale if it can't reach the primary nameserver.
	PASS	SOA MINIMUM TTL value	OK. Your SOA MINIMUM TTL is: 3600 seconds. This seems normal (about 3,600 to 86400 seconds or 1-24 hours is good). RFC2308 suggests a value of 1-3 hours. This value used to determine the default (technically, minimum) TTL (time-to-live) for DNS entries, but now is used for negative caching.
MX	FAIL	MX Category	ERROR: I couldn't find any MX records for msft.net. If you want to receive E-mail on this domain, you should have MX record(s). Without any MX records, mailservers should attempt to deliver mail to the A record for msft.net. I can't continue in a case like this, so I'm assuming you don't receive mail on this domain.
Mail	FAIL	Connect to mail servers	ERROR: I could not find any mailservers for msft.net.
WWW	FAIL	WWW Category	ERROR: I couldn't find any A records for www.msft.net. But I did find a referral to ns1.msft.net. (and maybe others). If you want a website at www.msft.net, you will need an A record for www.msft.net. If you do not want a website at www.msft.net, you can ignore this error.

DNS Report for microsoft.com

Generated by www.DNSReport.com at 16:12:04 GMT on 08 Nov 2005.

Category	Status	Test Name	Information
Parent	PASS	Missing Direct Parent check	OK. Your direct parent zone exists, which is good. Some domains (usually third or fourth level domains, such as example.co.us) do not have a direct parent zone ('co.us' in this example), which is legal but can cause confusion.
	INFO	NS records at parent servers	<p>Your NS records at the parent servers are:</p> <pre> ns1.msft.net. [207.46.245.230] [TTL=172800] [US] ns2.msft.net. [64.4.25.30] [TTL=172800] [US] ns3.msft.net. [213.199.144.151] [TTL=172800] [UK] ns4.msft.net. [207.46.66.75] [TTL=172800] [US] ns5.msft.net. [207.46.138.20] [TTL=172800] [US] </pre> <p>[These were obtained from h.gtld-servers.net]</p>
	PASS	Parent nameservers have your nameservers listed	OK. When someone uses DNS to look up your domain, the first step (if it doesn't already know about your domain) is to go to the parent servers. If you aren't listed there, you can't be found. But you are listed there.
	PASS	Glue at parent nameservers	OK. The parent servers have glue for your nameservers. That means they send out the IP address of your nameservers, as well as their host names.
	PASS	DNS servers have A records	OK. All your DNS servers either have A records at the zone parent servers, or do not need them (if the DNS servers are on other TLDs). A records are required for your hostnames to ensure that other DNS servers can reach your DNS servers. Note that there will be problems if your DNS servers do not have these same A records.
	INFO	NS records at your nameservers	<p>Your NS records at your nameservers are:</p> <pre> ns1.msft.net. [207.46.245.230] [TTL=172800] ns2.msft.net. [64.4.25.30] [TTL=172800] ns3.msft.net. [213.199.144.151] [TTL=172800] ns4.msft.net. [207.46.66.75] [TTL=172800] ns5.msft.net. [207.46.138.20] [TTL=172800] </pre>
	PASS	Mismatched glue	OK. The DNS report did not detect any discrepancies between the glue provided by the parent servers and that provided by your authoritative DNS servers.
	PASS	No NS A records at nameservers	OK. Your nameservers do include corresponding A records when asked for your NS records. This ensures that your DNS servers know the A records corresponding to all your NS records.

NS

PASS	All nameservers report identical NS records	OK. The NS records at all your nameservers are identical.
PASS	All nameservers respond	OK. All of your nameservers listed at the parent nameservers responded.
PASS	Nameserver name validity	OK. All of the NS records that your nameservers report seem valid (no IPs or partial domain names).
PASS	Number of nameservers	OK. You have 5 nameservers. You must have at least 2 nameservers (RFC2182 section 5 recommends at least 3 nameservers), and preferably no more than 7.
PASS	Lame nameservers	OK. All the nameservers listed at the parent servers answer authoritatively for your domain.
PASS	Missing (stealth) nameservers	OK. All 5 of your nameservers (as reported by your nameservers) are also listed at the parent servers.
PASS	Missing nameservers 2	OK. All of the nameservers listed at the parent nameservers are also listed as NS records at your nameservers.
PASS	No CNAMEs for domain	OK. There are no CNAMEs for microsoft.com. RFC1912 2.4 and RFC2181 10.3 state that there should be no CNAMEs if an NS (or any other) record is present.
PASS	No NSs with CNAMEs	OK. There are no CNAMEs for your NS records. RFC1912 2.4 and RFC2181 10.3 state that there should be no CNAMEs if an NS (or any other) record is present.
PASS	Nameservers on separate class C's	OK. You have nameservers on different Class C (technically, /24) IP ranges. You must have nameservers at geographically and topologically dispersed locations. RFC2182 3.1 goes into more detail about secondary nameserver location.
PASS	All NS IPs public	OK. All of your NS records appear to use public IPs. If there were any private IPs, they would not be reachable, causing DNS delays.
INFO	Nameservers versions	<p>Your nameservers have the following versions:</p> <p>207.46.245.230: No version info available (CHAOS not implemented).</p> <p>64.4.25.30: No version info available (CHAOS not implemented).</p> <p>213.199.144.151: No version info available (CHAOS not implemented).</p> <p>207.46.66.75: No version info available (CHAOS not implemented).</p>

		implemented). 207.46.138.20: No version info available (CHAOS not implemented).
	PASS	Stealth NS record leakage Your DNS servers do not leak any stealth NS records (if any) in non-NS requests.
SOA		Your SOA record [TTL=3600] is: Primary nameserver: dns.cp.msft.net. Hostmaster E-mail address: msnhst.microsoft.com. Serial: 2005110701 Refresh: 300 Retry: 600 Expire: 2419200 Default TTL: 3600
	PASS	NS agreement on SOA serial # OK. All your nameservers agree that your SOA serial number is 2005110701. That means that all your nameservers are using the same data (unless you have different sets of data with the same serial number, which would be very bad)! Note that the DNS Report only checks the NS records listed at the parent servers (not any stealth servers).
	WARN	SOA MNAME Check WARNING: Your SOA (Start of Authority) record states that your master (primary) name server is: dns.cp.msft.net. However, that server is not listed at the parent servers as one of your NS records! This is probably legal, but you should be sure that you know what you are doing.
	PASS	SOA RNAME Check OK. Your SOA (Start of Authority) record states that your DNS contact E-mail address is: msnhst@microsoft.com. (techie note: we have changed the initial '.' to an '@' for display purposes).
	PASS	SOA Serial Number OK. Your SOA serial number is: 2005110701 . This appears to be in the recommended format of YYYYMMDDnn, where 'nn' is the revision. For example, if you are making the 3rd change on 02 May 2000, you would use 2000050203. This number must be incremented every time you make a DNS change.
	WARN	SOA REFRESH value WARNING: Your SOA REFRESH interval is : 300 seconds . This seems low. You should consider increasing this value to about 3600-7200 seconds. RFC1912 2.2 recommends a value between 1200 to 43200 seconds (20 minutes to 12 hours). A value that is too low will unnecessarily increase Internet traffic.
	PASS	SOA RETRY OK. Your SOA RETRY interval is : 600 seconds . This seems normal (about 120-7200 seconds is good). The retry value is the amount of time your secondary/slave

	value	nameservers will wait to contact the master nameserver again if the last attempt failed.
PASS	SOA EXPIRE value	OK. Your SOA EXPIRE time: 2419200 seconds . This seems normal (about 1209600 to 2419200 seconds (2-4 weeks) is good). RFC1912 recommends 2-4 weeks. This is how long a secondary/slave nameserver will wait before considering its DNS data stale if it can't reach the primary nameserver.
PASS	SOA MINIMUM TTL value	OK. Your SOA MINIMUM TTL is: 3600 seconds . This seems normal (about 3,600 to 86400 seconds or 1-24 hours is good). RFC2181 suggests a value of 2000 hours. This value is used to determine the default (technically, minimum) TTL (time-to-live) for DNS entries, but now is used for negative caching.

MX	INFO	MX Record	Your 3 MX records are: 10 mailc.microsoft.com. [TTL=3600] IP=205.248.102.79 [TTL=3600] [US] IP=205.248.102.78 [TTL=3600] [US] 10 maila.microsoft.com. [TTL=3600] IP=131.107.3.125 [TTL=3600] [US] IP=131.107.3.124 [TTL=3600] [US] 10 mailb.microsoft.com. [TTL=3600] IP=131.107.3.123 [TTL=3600] [US] IP=205.248.102.77 [TTL=3600] [US]
	PASS	Invalid characters	OK. All of your MX records appear to use valid hostnames, without any invalid characters.
	PASS	All MX IPs public	OK. All of your MX records appear to use public IPs. If there were any private IPs, they would not be reachable, causing slight mail delays, extra resource usage, and possibly bounced mail.
	PASS	MX records are not CNAMEs	OK. Looking up your MX record did not just return a CNAME. If an MX record query returns a CNAME, extra processing is required, and some mail servers may not be able to handle it.
	PASS	MX A lookups have no CNAMEs	OK. There appear to be no CNAMEs returned for A records lookups from your MX records (CNAMEs are prohibited in MX records, according to RFC974 , RFC1034 3.6.2, RFC1912 2.4, and RFC2181 10.3).
	PASS	MX is host name, not IP	OK. All of your MX records are host names (as opposed to IP addresses, which are not allowed in MX records).
	PASS	Multiple MX records	OK. You have multiple MX records. This means that if one is down or unreachable, the other(s) will be able to accept mail for you.
	PASS	Differing MX-A	OK. I did not detect differing IPs for your MX records (this would happen if your DNS servers return different IPs than the DNS servers that are

	records	authoritative for the hostname in your MX records).
PASS	Duplicate MX records	OK. You do not have any duplicate MX records (pointing to the same IP). Although technically valid, duplicate MX records can cause a lot of confusion, and waste resources.
PASS	Reverse DNS entries for MX records	OK. The IPs of all of your mail server(s) have reverse DNS (PTR) entries. RFC1912 2.1 says you should have a reverse DNS for all your mail servers. It is strongly urged that you have them, as many mailservers will not accept mail from mailservers with no reverse DNS entry. Note that this information is <i>cached</i> , so if you changed it recently, it will not be reflected here (see the www.DNSstuff.com Reverse DNS Tool for the current data). The reverse DNS entries are: 78.102.248.205.in-addr.arpa mail5.microsoft.com. [TTL=2460] 124.3.107.131.in-addr.arpa mail2.microsoft.com. [TTL=2460] 77.102.248.205.in-addr.arpa mailb.microsoft.com. [TTL=2460]

PASS	Connect to mail servers	OK: I was able to connect to all of your mailservers.
PASS	Mail server host name in greeting	OK: All of your mailservers have their host name in the greeting: mailb.microsoft.com: 220 IGS-IMC-01.northamerica.corp.microsoft.com <Inbound SMTP Virtual Server> Tue, 8 Nov 2005 08:12:10 -0800 mailc.microsoft.com: 220 IGS-IMC-02.northamerica.corp.microsoft.com <Inbound SMTP Virtual Server> Tue, 8 Nov 2005 08:12:10 -0800 maila.microsoft.com: 220 IGR-IMC-02.redmond.corp.microsoft.com <Inbound SMTP Virtual Server> Tue, 8 Nov 2005 08:12:11 -0800
PASS	Acceptance of NULL < sender	OK: All of your mailservers accept mail from "<". You are required (RFC115.2.9) to receive this type of mail (which includes reject/bounce messages and return receipts).
PASS	Acceptance of postmaster address	OK: All of your mailservers accept mail to postmaster@microsoft.com (as required by RFC822 6.3, RFC1123 5.2.7, and RFC2821 4.5.1).
PASS	Acceptance of abuse address	OK: All of your mailservers accept mail to abuse@microsoft.com.
INFO	Acceptance of domain	WARNING: One or more of your mailservers does not accept mail in the domain literal format (user@[0.0.0.0]). Mailservers are technically required RFC1123 5.2.17 to accept mail to domain literals for any of its IP addresses. If accepting domain literals can make it more difficult to test your mailserver, as can prevent you from receiving E-mail from people reporting problems with your mailserver. However, it is unlikely that any problems will occur if the domain literals are not accepted (mailservers at many common large domains have this problem).

Mail

	literals	<p>mailb.microsoft.com's postmaster@[205.248.102.77] response: >>> RCPT TO:<postmaster@[205.248.102.77]> <<< 550 5.7.1 Unable to relay for postmaster@[205.248.102.77] mailc.microsoft.com's postmaster@[205.248.102.78] response: >>> RCPT TO:<postmaster@[205.248.102.78]> <<< 550 5.7.1 Unable to relay for postmaster@[205.248.102.78] maila.microsoft.com's postmaster@[131.107.3.124] response: >>> RCPT TO:<postmaster@[131.107.3.124]> <<< 550 5.7.1 Unable to relay for postmaster@[131.107.3.124]</p>	
PASS	Open relay test	<p>OK: All of your mailservers appear to be closed to relaying. This is <i>not</i> a thorough check, you can get a thorough one here. mailb.microsoft.com OK: 550 5.7.1 Unable to relay for Not.abuse.see.www.DNSreport.com.from.IP.12.109.34.158@DNSreport.com mailc.microsoft.com OK: 550 5.7.1 Unable to relay for Not.abuse.see.www.DNSreport.com.from.IP.12.109.34.158@DNSreport.com maila.microsoft.com OK: 550 5.7.1 Unable to relay for Not.abuse.see.www.DNSreport.com.from.IP.12.109.34.158@DNSreport.com</p>	
PASS	SPF record	<p>You have an <u>SPF record</u>. This is very good, as it will help prevent spammers from abusing your domain. Your SPF record is: "v=spf1 mx redirect=_spf.microsoft.com" [TTL=3600]</p>	
WWW 	INFO	WWW Record	<p>Your www.microsoft.com A record is: www.microsoft.com. CNAME toggle.www.ms.akadns.net.</p>
	PASS	All WWW IPs public	<p>OK. All of your WWW IPs appear to be public IPs. If there were IPs, they would not be reachable, causing problems reaching you</p>
	WARN	CNAME Lookup	<p>WARNING. Your web site (www.microsoft.com) has a CNAME pointing to toggle.www.ms.akadns.net.. That by itself is confusingly acceptable. However, the CNAME record in this case causes an extra lookup, which will slightly delay visitors to your website, and use bandwidth.</p>

Legend:

- Rows with a FAIL indicate a problem that in most cases really should be fixed.
- Rows with a WARN indicate a possible minor problem, which often is not worth pursuing.
- Note that all information is accessed in real-time (except where noted), so this is the freshest information about your domain.

DNS Report for msn.com

Generated by www.DNSreport.com at 20:42:42 GMT on 11 Jan 2006.

Category	Status	Test Name	Information
Parent	PASS	Missing Direct Parent check	OK. Your direct parent zone exists, which is good. Some domains (usually third or fourth level domains, such as example.co.us) do not have a direct parent zone ('co.us' in this example), which is legal but can cause confusion.
	INFO	NS records at parent servers	Your NS records at the parent servers are: ns1.msft.net. [207.46.245.230] [TTL=172800] [US] ns2.msft.net. [64.4.25.30] [TTL=172800] [US] ns3.msft.net. [213.199.144.151] [TTL=172800] [UK] ns4.msft.net. [207.46.66.75] [TTL=172800] [US] ns5.msft.net. [207.46.138.20] [TTL=172800] [US] [These were obtained from g.gtld-servers.net]
	PASS	Parent nameservers have your nameservers listed	OK. When someone uses DNS to look up your domain, the first step (if it doesn't already know about your domain) is to go to the parent servers. If you aren't listed there, you can't be found. But you are listed there.
	PASS	Glue at parent nameservers	OK. The parent servers have glue for your nameservers. That means they send out the IP address of your nameservers, as well as their host names.
	PASS	DNS servers have A records	OK. All your DNS servers either have A records at the zone parent servers, or do not need them (if the DNS servers are on other TLDs). A records are required for your hostnames to ensure that other DNS servers can reach your DNS servers. Note that there will be problems if your DNS servers do not have these same A records.
NS	INFO	NS records at your	Your NS records at your nameservers are: ns2.msft.net. [64.4.25.30] [TTL=172800]

	nameservers	ns3.msft.net. [213.199.144.151] [TTL=172800] ns4.msft.net. [207.46.66.75] [TTL=172800] ns5.msft.net. [207.46.138.20] [TTL=172800] ns1.msft.net. [207.46.245.230] [TTL=172800]
PASS	Mismatched glue	OK. The DNS report did not detect any discrepancies between the glue provided by the parent servers and that provided by your authoritative DNS servers.
PASS	No NS A records at nameservers	OK. Your nameservers do include corresponding A records when asked for your NS records. This ensures that your DNS servers know the A records corresponding to all your NS records.
PASS	All nameservers report identical NS records	OK. The NS records at all your nameservers are identical.
PASS	All nameservers respond	OK. All of your nameservers listed at the parent nameservers responded.
PASS	Nameserver name validity	OK. All of the NS records that your nameservers report seem valid (no IPs or partial domain names).
PASS	Number of nameservers	OK. You have 5 nameservers. You must have at least 2 nameservers (<u>RFC2182</u> section 5 recommends at least 3 nameservers), and preferably no more than 7.
PASS	Lame nameservers	OK. All the nameservers listed at the parent servers answer authoritatively for your domain.
PASS	Missing (stealth) nameservers	OK. All 5 of your nameservers (as reported by your nameservers) are also listed at the parent servers.
PASS	Missing nameservers 2	OK. All of the nameservers listed at the parent nameservers are also listed as NS records at your nameservers.
PASS	No CNAMEs for domain	OK. There are no CNAMEs for msn.com. <u>RFC1912</u> 2.4 and <u>RFC2181</u> 10.3 state that there should be no CNAMEs if an NS (or any other) record is present.

Case 3:08-cv-01465-VRW Document 51-4 Filed 07/17/2008 Page 51 of 60

	PASS	No NSs with CNAMEs	OK. There are no CNAMEs for your NS records. <u>RFC1912</u> 2.4 and <u>RFC2181</u> 10.3 state that there should be no CNAMEs if an NS (or any other) record is present.
	PASS	Nameservers on separate class C's	OK. You have nameservers on different Class C (technically, /24) IP ranges. You must have nameservers at geographically and topologically dispersed locations. <u>RFC2182</u> 3.1 goes into more detail about secondary nameserver location.
	PASS	All NS IPs public	OK. All of your NS records appear to use public IPs. If there were any private IPs, they would not be reachable, causing DNS delays.
	INFO	Nameservers versions	Your nameservers have the following versions: 207.46.245.230: No version info available (CHAOS not implemented). 64.4.25.30: No version info available (CHAOS not implemented). 213.199.144.151: No version info available (CHAOS not implemented). 207.46.66.75: No version info available (CHAOS not implemented). 207.46.138.20: No version info available (CHAOS not implemented).
	PASS	Stealth NS record leakage	Your DNS servers do not leak any stealth NS records (if any) in non-NS requests.
SOA	INFO	SOA record	Your SOA record [TTL=86400] is: Primary nameserver: dns.cp.msft.net. Hostmaster E-mail address: msnhst.microsoft.com. Serial #: 2006010504 Refresh: 1800 Retry: 900 Expire: 2419200 Default TTL: 900
	PASS	NS agreement on SOA serial #	OK. All your nameservers agree that your SOA serial number is 2006010504. That means that all your nameservers are using the same data (unless you have different sets of data with the same serial number, which would be very bad)! Note that the DNS Report only checks the NS records listed at the parent servers (not any stealth servers).
	WARN	SOA	WARNING: Your SOA (Start of Authority)

*

	MNAME Check	record states that your master (primary) name server is: dus.cp.msft.net. However, that server is not listed at the parent servers as one of your NS records! This is probably legal, but you should be sure that you know what you are doing.
PASS	SOA RNAME Check	OK. Your SOA (Start of Authority) record states that your DNS contact E-mail address is: msnhst@microsoft.com. (techie note: we have changed the initial '.' to an '@' for display purposes)
PASS	SOA Serial Number	OK. Your SOA serial number is: 2006010504. This appears to be in the recommended format of YYYYMMDDnn, where 'nn' is the revision. For example, if you are making the 3rd change on 02 May 2000, you would use 2000050203. This number must be incremented every time you make a DNS change.
PASS	SOA REFRESH value	OK. Your SOA REFRESH interval is : 1800 seconds. This seems normal (about 3600-7200 seconds is good if not using DNS NOTIFY; RFC1912 2.2 recommends a value between 1200 to 43200 seconds (20 minutes to 12 hours)). This value determines how often secondary/slave nameservers check with the master for updates.
PASS	SOA RETRY value	OK. Your SOA RETRY interval is : 900 seconds. This seems normal (about 120-7200 seconds is good). The retry value is the amount of time your secondary/slave nameservers will wait to contact the master nameserver again if the last attempt failed.
PASS	SOA EXPIRE value	OK. Your SOA EXPIRE time: 2419200 seconds. This seems normal (about 1209600 to 2419200 seconds (2-4 weeks) is good). RFC1912 recommends 2-4 weeks. This is how long a secondary/slave nameserver will wait before considering its DNS data stale if it can't reach the primary nameserver.
PASS	SOA MINIMUM TTL value	OK. Your SOA MINIMUM TTL is: 900 seconds. This seems normal (about 3,600 to 86400 seconds or 1-24 hours is good). RFC2308 suggests a value of 1-3 hours. This value used to determine the default (technically, minimum) TTL (time-to-live) for DNS entries, but now is used for negative

Case 3:08-cv-01465-VRW

			caching.
MX	INFO	MX Record	<p>Your 4 MX records are:</p> <p>5 mx4.hotmail.com. [TTL=900] IP=65.54.245.104 [TTL=3600] [US] IP=65.54.190.179 [TTL=3600] [US] IP=65.54.244.104 [TTL=3600] [US] IP=65.54.244.232 [TTL=3600] [US] 5 mx1.hotmail.com. [TTL=900] IP=65.54.244.8 [TTL=3600] [US] IP=64.4.50.50 [TTL=3600] [US] IP=65.54.245.8 [TTL=3600] [US] IP=65.54.244.136 [TTL=3600] [US] 5 mx2.hotmail.com. [TTL=900] IP=65.54.245.40 [TTL=3600] [US] IP=65.54.244.168 [TTL=3600] [US] IP=65.54.244.40 [TTL=3600] [US] IP=65.54.190.50 [TTL=3600] [US] 5 mx3.hotmail.com. [TTL=900] IP=65.54.244.200 [TTL=3600] [US] IP=64.4.50.179 [TTL=3600] [US] IP=65.54.244.72 [TTL=3600] [US] IP=65.54.245.72 [TTL=3600] [US]</p>
PASS	Invalid characters		OK. All of your MX records appear to use valid hostnames, without any invalid characters.
PASS	All MX IPs public		OK. All of your MX records appear to use public IPs. If there were any private IPs, they would not be reachable, causing slight mail delays, extra resource usage, and possibly bounced mail.
PASS	MX records are not CNAMEs		OK. Looking up your MX record did not just return a CNAME. If an MX record query returns a CNAME, extra processing is required, and some mail servers may not be able to handle it.
PASS	MX A lookups have no CNAMEs		OK. There appear to be no CNAMEs returned for A records lookups from your MX records (CNAMEs are prohibited in MX records, according to <u>RFC974</u> , <u>RFC1034</u> 3.6.2, <u>RFC1912</u> 2.4, and <u>RFC2181</u> 10.3).
PASS	MX is host name, not IP		OK. All of your MX records are host names (as opposed to IP addresses, which are not allowed in MX records).
PASS	Multiple MX records		OK. You have multiple MX records. This means that if one is down or unreachable, the other(s) will be able to accept mail for you.

Case 3:08-cv-01465-VRW Document 51-4 Filed 07/15/2008 Page 54 of 60

	PASS	Differing MX-A records	OK. I did not detect differing IPs for your MX records (this would happen if your DNS servers return different IPs than the DNS servers that are authoritative for the hostname in your MX records).
	PASS	Duplicate MX records	OK. You do not have any duplicate MX records (pointing to the same IP). Although technically valid, duplicate MX records can cause a lot of confusion, and waste resources.
	PASS	Reverse DNS entries for MX records	OK. All of your mail servers have reverse DNS (PTR) entries. RFC1912 2.1 says you should have a reverse DNS for all your mail servers. It is strongly urged that you have them, as many mailservers will not accept mail from mailservers with no reverse DNS entry. Note that this information is <i>cached</i> , so if you changed it recently, it will not be reflected here (see the www.DNSstuff.com Reverse DNS Tool for the current data). The reverse DNS entries are: 232.244.54.65.in-addr.arpa mx4.hotmail.com. [TTL=2455] 136.244.54.65.in-addr.arpa mail.hotmail.com. [TTL=2698] 50.190.54.65.in-addr.arpa mail.hotmail.com. [TTL=2455] 72.245.54.65.in-addr.arpa bay0-mc11-f.bay0.hotmail.com. [TTL=3325]
Mail *	FAIL	Connect to mail servers	ERROR: I could not complete a connection to one or more of your mailservers: mx2.hotmail.com: Timed out [Last data sent: [Did not connect]]
Mail *	WARN	Mail server host name in greeting	WARNING: One or more of your mailservers is claiming to be a host other than what it really is (the SMTP greeting should be a 3-digit code, followed by a space or a dash, then the host name). This probably won't cause any harm, but is a technical violation of RFC821 4.3 (and RFC2821 4.3.1). Note that the hostname given in the SMTP greeting should have an A record pointing back to the same server.

mx4.hotmail.com claims to be host bay0-

		is at 65.54.244.143, not 65.54.244.136]. mx3.hotmail.com claims to be host bay0-mc11-f2.bay0.hotmail.com [but that host is at 65.54.245.74, not 65.54.245.72].
PASS	Acceptance of NULL < sender	OK: All of your mailservers accept mail from "<". You are required (RFC1123 5.2.9) to receive this type of mail (which includes reject/bounce messages and return receipts).
	Acceptance of postmaster address	ERROR: One or more of your mailservers does not accept mail to postmaster@msn.com. Mailservers are required (RFC822 0.9, RFC1123 5.2.7, and RFC2821 4.5.1) to accept mail to postmaster. mx4.hotmail.com's postmaster response: >>> RCPT TO:<postmaster@msn.com> <<< 550 Requested action not taken: mailbox unavailable mx1.hotmail.com's postmaster response: >>> RCPT TO:<postmaster@msn.com> <<< 550 Requested action not taken: mailbox unavailable mx3.hotmail.com's postmaster response: >>> RCPT TO:<postmaster@msn.com> <<< 550 Requested action not taken: mailbox unavailable
PASS	Acceptance of abuse address	OK: All of your mailservers accept mail to abuse@msn.com.
INFO	Acceptance of domain literals	WARNING: One or more of your mailservers does not accept mail in the domain literal format (user@[0.0.0.0]). Mailservers are technically required RFC1123 5.2.17 to accept mail to domain literals for any of its IP addresses. Not accepting domain literals can make it more difficult to test your mailserver, and can prevent you from receiving E-mail from people reporting problems with your mailserver. However, it is unlikely that any problems will occur if the domain literals are not accepted (mailservers at many common large domains have this problem). mx1.hotmail.com's

Desiree and I did exchange e-mails
 (my co-worker at McClure)

what does law10 mean? Is this the trace file?

Is this why the phone wiring on the
 side of my home was installed different
 then it should have been?

Is there a file open at the DA's? FBI?
 CIA?

Does this have something to do with the
 time and time zones?

What did I cut off of the side of my
 house at the phone box? 10-ff

More Defined Statement Rev#1

1. **Exhibit A:** Its not a person it's a virus. Someone and or others appear to be using a partition on my computer(s) which involves icw5. Is it a new virus? I found the same thing in regards to Laskey v Adobe. How many partitions would a computer be able to support? Exhibit A is a copy of my email attempt to contact icw5. icw5 is a what being used by whom?
2. **Exhibit B:** The print out from my computer submitted with my first more definded statement is the **original** so please do not discard it. How is icw5 installed on the computers(s)? If I remember correctly I came across the file when I clicked on the header arrow in the "find files and folders" options. I thought it was odd that the location where you typed in the files and folders you are looking for is to the left on the side yet a header row is available at the top of the screen? When you go online you use the header row to type in your search requests. Since two options appear and only one is typically used why would that be? When I clicked on the arrow the file and or files presented themselves. I was told to keep a journal so each time I looked at something on my computer I wrote it down. I hope I did that correctly. Is this an indication of a hardware problem (product Liability)? Counsel

1 for the defendant confirms product liability in their disclosure statement for rule
2 26. I didn't know that icw5 was Microsoft's internet connection wizard version 5. I
3 didn't know it could be used as a browser and or that it was one. I did uncover
4 that the hackers were using the browser and or browsers to by pass the fire wall
5 and hack. I also looked at the printer files on my computer(s) because they
6 appeared to be attached to. Does icw5 run off of window's 95? The browser(s) the
7 printer, support, Window's 95, I was right I just didn't understand it until I read
8 Defendants rule 26 disclosures. Therefore based on the rule of discovery I just
9 discovered this and it falls within the statue of limitations. That or I can file
10 another claim because it is still on my computer and I have additional evidence
11 that pertains. **Exhibit E** reflects additional information on icw5. Also my
12 computer(s) reflect "internet explorer is not your default browser would you like
13 to change it" something along those lines. Since it brought up this message I tried
14 to find out what my browser was. So I poked around on the computer(s) and the
15 browser is set at default? Internet explorer is the only browser I remember so I
16 was wondering if information was changed on my computer to facilitate this. As
17 noted in **exhibit F** Vision Infrosoft is loading Material Express onto my computer and
18 then removing it!? (This is a copy of the original document since I am going to use
19 the original in my State Court Case Laskey v Vision Infrosoft. I'm not sure how to
20 turn my originals in? Federal or State? Or save them just in case I end up in the
21 9th district court or save them if I have to go public? I'm not willing to have my
22 evidence all over the place anymore. Should all my cases be consolidated to Federal
23 court?) Long story short - Since I have **lost the use of my property** I am unable to
24 change the settings therefore it is still on my computer and I am still injured by
25 it. Because the Microsoft browser appears to be being used for split tunneling on
26 my property this created a **premises liability** for me and because Microsoft
27 maintained faulty servers **it's a premises liability for Microsoft**. I was wondering
28 if icw5 is preinstalled on every computer. If so would that be an indication of
Class action? The day I unplugged my phone line something stopped working and that
produced a strange man in my yard looking for the utility boxes? The phone company
service technician said "all of Windsor had this problem". I hope I did my computer
research correctly. Is this an indication of a hardware problem and or **product**

1 **liability?** ICWX25A is the name of the file that was printed from my lap top.

2 Gateway on remote shows up = yes. Is that an indication of a remote connection?

3 3=waitfor "NAL",10 shows up. NAP backwards is LAN and or Local Area Network. Since

4 the connector in the second phone box should be attached to the incoming wires

5 fromt eh street yet is not, would that be an indication that my property was wired

6 backwards? Is this an indication of reverse commands and or reverse IP? Entry-

7 Name=Microsoft Internet Referral Service therefore it involves Microsoft.

8 Microsoft's contract with IANA does not allow them to be involved in any scam and

9 or sham. Would this be an indication of **Breach of Contract?** Does Microsoft have

10 Internet Referral Service **Servers** or is that what a **Router** is called? User shows up

11 which includes a name and a password, is this part of a computer program (virus)

12 that allows other to hack?

13 3. Exhibit C:

14 **3a.** This is everything I was able to research online about icw5. I cannot afford to
15 print out all 1-10 pf about 465.

16 **3b.** icw5 appears to link via Sprint to other online web sites for **shopping**. Defendant
17 wanted to know if any laws within the United States pertain to my case. Last time I
18 checked stealing was against the law, hacking, internet stalking, phone fraud, fraud,
19 identity theft, energy theft, invasion of privacy, etc. all of these laws pertain.

20 **3c.** Sprint shows up on my computer print outs. Are they piggy backing lines over my
21 phone line and or lines?

22 **3d.** In the ARIN "who is" data base when I looked up **gn** Sprint and **SBC** appear! Is gn
23 being used as a link?

24 **3e.** If AT&T purchased SBC then why haven't the SBC IP Blocks been transferred over to
25 AT&T? Shouldn't they reflect AT&T and not SBC? That's another part of my problem,
26 unfair business practice. That or we need to read the contract purchase agreements.

27 **3f.** If you are shopping online via hacking and purchase something, where would you ship
28 it? I asked RCN if that's what the abandon house in Springfield IL is being used for.

3g. Some of the other things that show up are odd in themselves. One of the things I
was wondering about is how the hackers link. Icw5 appears to be a Microsoft email
address except the gn isn't normal. Is it a bogus web site? The same thing happens with

1 headgames.com (see Laskey v Procter and Gamble). The icw5 web address simply links you
2 to other sites but doesn't have a site of its own?

3 **3h.** The shopping web sites listed in relation to icw5 have the words **clone** and **worm**
4 and **crack** and **hack**. Therefore I was wondering if the world wide web is part of the
5 hackers programming. I have been asked about "my calendar" as in where were you? One of
6 the documents I printed out says **clone** and or more than on of me and or Identity Theft.
7 Since the operator couldn't do an emergency break through was my property always online
8 even though I wasn't? Were the hackers able to know when I went online via a remote
9 connection? If so how was that established? Intel Corporation? My friends husband told
10 me I have a serious hacker problem. What better way to know all about me and
11 impersonate me then to be directly connected to me via my phone wires? I had no way of
12 knowing that. My documents reflect that even after I was told that everything was now
13 "OK" at my property that something must be connected wrong at SBC! The consumer has no
14 control over that. Neighborhood watch - who would suspect a phone company vehicle?
15 Defendant asks for who's doing this; does 1 - 1000 **not inclusive**.

16 **3i.** New laws need to be put in place to protect the consumer some of which would
17 include GPS tracking devices on service vehicles. Have your phone box and or boxes
18 installed inside of your garage that way no one else has access to your phone wires and
19 or phone lines. You would then have to be home when the service occurs and or when
20 changes are made to your service. The consumer would need to be made aware that they
21 should supervise what's going on and or be able to hire an independent contractor to do
22 the work instead of the phone company because like me would the consumer know what the
23 service technician was doing? In addition Landlords should be required to keep the
24 phone closets locked. In 99% of the buildings I've ever been in they are but for some
25 reason in the building I worked in it was not? In addition to having a network
26 administrator for their building to supervise any changes being made. Not to mention
27 operation and maintenance manuals **should always be provided to the consumer** at the time
28 of installation. In my case I was never charged for the product it was just installed.
The product installed exceeded the service requested so at the time of purchase does
not apply. Charles Industries posts the information online in regards to the product
therefore it is not proprietary therefore the operation and maintenance manuals should
have been made available. I didn't know that the Charles Industries product had a DSL

1 unit. Let alone that it required power in order to operate. Is the power company (in my
2 case PG&E) notified when this product is installed? Who double checks things like this?
3 How are the audits performed? Has anyone ever gone out to the consumer's property and
4 double checked an installation based on inventory? Billing? They should. The consumer
5 is not made aware of all of this. It was not a pleasant thing to have to be exposed to.
6 It was the most traumatizing thing you can ever imagine having to experience; you call
7 the phone company because the operator can't do an emergency break through. The phone
8 company sends out some to fix the problem. During the service call you suddenly realize
9 that you are potentially standing next to the person who hacked into your computer and
10 stole your identity and you don't know what to do about it or how to prove it. Should I
11 have had the police department present at that time? **YES!** Can you please send a police
12 officer out to my home while I have my phone line checked? That would not have been a
13 normal request in hind sight that would have been a better way to go about it. How was
14 I to know?

15 4. **Exhibit D:** In addition to people, businesses are also being affected by this. I
16 have enclosed an article for your review. It's been a few years since this article
17 was published I'm sure the numbers are much higher now. Possibly the FTC could
18 provide us with information in regards to all of this. Like me, it would be on
19 file. I have tried to provide the FTC with all of my information. I haven't been
20 able to keep up with that and do all of this.

21 Split tunneling occurred. Microsoft's servers are being used and so is their browser. If
22 the servers are not being maintained property that would establish negligence, premises
23 liability, obstruction of justice, breach of contract and in general mass tort.

24 In my email dated 12-4-1997 (Laskey v RCV and Laskey v AOL) The email reflects the
25 following "We would like to hire you to do a plan check" instead of a plan check I ended
26 up doing an "Internet Check". I didn't know that my job mirrored my task. I gave my word.
27 Is this the evidence you seek? Thank you for the opportunity to amend.

Google Search

- Lookup monstermarketplace.com in simple text format at <https://www.showmyip.com/simple> or in XML format at <https://www.showmyip.com/xml>
- Lookup 216.105.60.75 in simple text format at <https://www.showmyip.com/simple> or in XML format at <https://www.showmyip.com/xml>

IP Address Lookup Form	
IP Address: <input type="text"/>	
or Host Name: <input type="text"/>	
or "Long" IP Address: <input type="text"/>	
or Tor node nickname: <input type="text"/>	
or Tor node fingerprint: <input type="text"/>	
Lookup Subscription Key: <input type="text"/>	
Secure Lookup (using SSL) ... 4,998 more Lookups allowed today.	
Check your Subscription status here .	
Choose the lookup fields you want to see. Using our simple text or xml interface, you can specify with the &get= parameter any available field name, in any sequence. For example http://www.showmyip.com/simple/?host=yahoo.com&get=ip,country,state_name,city,timezone will get you a comma-delimited list of only the 5 lookup fields specified.	
Multiple data sources are used for some lookup fields. You will see (verified) whenever and wherever we can get the same result from more than 1 data source. In some instances, though, this will only be available to subscribers.	

IP Address Lookup file to upload:	
<input type="text"/>	<input type="button" value="Browse..."/>
Lookup Subscription Key: <input type="text"/>	
Lookup data fields to retrieve: <input type="text" value="ip,country_code,remaining_count"/>	
• For a complete list of available Lookup data fields, do your file upload from here .	
Secure Lookup File Upload (using SSL) ... <input type="text"/>	

Need to purchase additional IP Address Lookups? Or get access to all returned data fields? Or need more consistent, faster lookup results? ➡

Санкт-Петербург: бесплатные тестовые входы в инет

06.06.2006 ::: Re@ctor ::: : комментов: 14 ::: просмотров: 770

Вспомнил тут про списки старые бесплатных тестовых входов и интернет, выложу, может кому-то пригодится.. Актуально только для Питера.

icw5 =))))

Легендарное ICW5, в котором сидели люди на спринте и общались. Щас оно всёдохлое конечно, нет связи по ip между помпами в подсети, но пусть болтается на вечную память. Про icw5 вы можете почитать набрав в яндексе icw5 спринт.

www.key.ru

популярность росла м геометрической прогрессии в кубе *) - в первый день - 2человека, в следующий - 50, через пару дней - около нескольких тысяч подключений, а дальше шкалило..
ну да ладно, хым..

весёлые всё же времена были..

Владимир [09.06.2006 12:08:22]:

Да, весело было.Отсидел с 4 до 1 ночи невылезая.Только через минут 40 выкидывало. Жаль что узнал в последний день про тестовик ПТНа.

Re@ctor [09.06.2006 13:56:12]:

мэйби проверить акки застарелые с инфостара.. авось локаль какую эквантовскую разбанили..

Владимир [11.06.2006 14:43:26]:

акки застарелые проверить было бы неплохо. А проверить весь ио - еще лучше. День дозваниваться сидеть, а потом модем ставит кеды...

Re@ctor [11.06.2006 22:13:06]:

уу.. обзвонить весь ио это аццко. тебе на это не хватит пары месяцев. особенно с импульсным набором. скорее приедут атсники на дом с лопатами.

Владимир [12.06.2006 15:33:06]:

Вроде в х.25 faq писалось о проверки акков через циску, токо какого прова я не помню. Почеиу бы не написать прогу, кот. будет проверять все это дело по телнету

Гость, обозвал себя TruNoob [23.06.2006 15:36:40]:

Тестовый вход недавно открывшегося провайдера (Санкт-Петербург).

Телефон: 5831818

Логин: test

Пароль: welcome

Связь хорошая, не лагает. Список доступных ресурсов:

<http://www.key.ru>

<http://www.infostar.ru>

<http://www.mail.ru> (с которого я сейчас и пишу!)

<http://www.gamezone.ru>

<http://www.cprise.ru>

<http://www.yandex.ru> (!!)

Возможно, какие-то еще, о которых не говорится на официальном сайте. Лимит на сессию - 30 минут. Вполне достаточно чтобы проверить почту. Это не кредит, если у кого-то возникнут такие подозрения. Предоставлять лимитированный доступ за деньги никто не будет.

ExclusivE [24.06.2006 01:06:57]:

Все равно все тестовики скоро накроются тазомм.. См. тут.

Re@ctor [24.06.2006 16:05:01]:

6/5/2008

Online auction scams soar — complaints nearly double

By Carolyn Said
CHRONICLE STAFF WRITER

As online auctions explode in popularity, more crooks are muscling in on the territory.

Complaints about Internet auctions were the fastest-growing category in an annual Federal Trade Commission report on fraud released Tuesday. They al-

most doubled to 98,650 in 2004, up from 51,000 in 2002, and accounted for 16 percent of all complaints.

The total number of complaints about Internet-related crimes — including fraudulent auctions, Internet services and scams in which the consumer was contacted or responded via the Internet — was 205,568. The crimes

cost consumers \$265 million, with a median loss of \$214, the FTC said.

Despite the rapid rise in Internet fraud, identity theft — through credit card, bank and phone fraud — continued to be the largest source of complaints. The FTC said 246,570 people reported that they were victimized, up from

161,890 in 2002.

Overall, consumers reported losing more than half a billion dollars to fraud last year, the FTC said. The agency received 635,173 complaints, up 57 percent from 403,688 in 2002.

"There's a certain percentage of our population that are con artists and scammers, let's say it's about 3 percent," said Rosalinda Baldwin, CEO of TheAuctionGuild.com, an upstate New York site that acts as a watchdog and information provider for online auction users. "As those people get more Net savvy, their business in the analog world is just going to move online."

"It behooves a person who is thinking about transacting business online to become educated," said David Steiner, president of AuctionBytes.com in Massachusetts. "It's not an innocent little playground anymore."

Online auction fans have gone even further. Frustrated that auction leader eBay, as they see it, isn't sufficiently proactive about hunting down con artists, they've taken matters into their own hands.

False bids, fake receipts

Self-styled auction vigilantes try to combat online scammers by giving them a taste of their own medicine. Some submit false bids to auctioneers they believe are crooks, including sending fake Western Union receipts to trick the auction-holders into thinking they've landed a sale.

"We bait (scammers). We waste their time," said Keith, the moderator of a site called TheScamBaiter.com. He declined to give his last name for fear of reprisals from scammers.

"This weekend, a friend and I 'bought' 30 or 40 Super Bowl tickets from Romanian scammers," he said. "If we get four or five people baiting a single scammer, he's hands full. He thinks he's going to get all this money."

Keith said he spends a couple of hours a day "baiting" auction scammers, fitting it in around his job as a Virginia building contrac-

tor.

"We've done a lot more damage to the scammers than eBay has ever done. We have it down to a science, where we're really confident whoever we're going after (is a fraudulent seller)," he said.

Keith said scam baiters also will launch "denial of service" attacks,

"It behooves a person ... to become educated. It's not an innocent little playground anymore."

DAVID STEINER
president of AuctionBytes.com

in which hundreds of computers flood fraudulent sites with messages, effectively shutting them down.

The baiters have an unusual way to measure success.

"We also try to get death threats from (scammers)," Keith said. "Among scam baiters, a death threat is considered a trophy. That means you're doing your job, you really pissed them off."

eBay spokesman Hani Durzy said the company does not condone such practices.

"We believe there is a very clear line between community activism and vigilantism," he said. "Anybody who takes what we consider to be un-eBay like actions against other users because of an assertion they have, we request our community refrain from doing that."

Only a small fraction of 1 percent of eBay listings is confirmed to be fraudulent, Durzy said. Last year the company hosted 1.4 billion listings, including both auction and fixed-price items.

"In the grand scheme of things, it's a very rare occurrence on eBay," he said. "Fraud is not completely eliminated on eBay nor on any other open, transparent market."

Some eBay watchers say the company does all it can to downplay fraud complaints because it doesn't want to scare customers away.

"eBay is horrible," said Baldwin of TheAuctionGuild.com. "If you report too many scam sellers on the site, if eBay does anything about them, it's a miracle. And if you get too vocal about it, especially if you talk to a reporter, eBay suspends you. That's crazy. They don't want people hearing about fraud."

eBay said it takes complaints seriously.

"We look at every fraud report

that comes into us," Durzy said. "We rely on the community to alert us to instances where they feel they have been wronged."

Marcy Fraser, who works in administration at UCSF, said she was disappointed with eBay's response when she bought a \$150 mini-disk recorder that arrived dented and unusable.

"The auction company response was pathetic," she said. "I tried to do the eBay and PayPal (eBay's online payment service) mediation. They were both completely useless. They make you fill out a bunch of forms, make you wait, do what they call an investigation, which is basically sending e-mails to the sender, so it's your word against theirs."

After returning the damaged item and unsuccessfully requesting her money back, Fraser said she contacted police in the seller's hometown of Wilton, Conn. "Ultimately the problem was solved by a resourceful police detective, and my money was finally returned," she said.

'Trust and safety team'

Durzy said eBay has more than 1,000 people on its "trust and safety team," which includes engineers, code writers, analysts and fraud investigators. The company does not break out the number of fraud investigators.

The FTC said the Bay Area had the dubious distinction of registering high on the agency's list of regions with the most per-capita fraud complaints. The area of San Jose, Sunnyvale and Santa Clara had 2,988 complaints, or 172.1 per 100,000 residents, making it second in the nation after the Washington, D.C., region.

San Francisco, Oakland and Fremont ranked seventh in the nation with 6,748 complaints, or 163.6 per 100,000 residents.
